SIMULATION WARNING CODE

Expand local fertilizer buffer reserves by 15%; establish emergency agricultural credit structures; prioritize fertilizer rake dispatches.

Reduce Freight Exposure 18%
(dampens pricing pass-through by 0.5%).

✧ Generate Brief

The Sovereign Economic Intelligence mesh registers a ****STEADY**** physical state (Index Score: ****73.7****). Simulated stress multipliers indicate a projected GDP shift of ****+0.35%**** and inflation transmission delta of ****+0.39%**** under expected shock parameters.

A composite analysis of physical cargo flows, port dwell times, and mandi arrivals indicates:

- ****Maritime Shipping Port Terminals**:** Coastal gate yard volumes are operating at ****Stable**** levels due to trade lane deviations. Mundra Port registers a yard dwell deviation of ****15%****.
- ****Dedicated Corridors**:** Rail freight speeds stand at ****normal**** compared to baseline schedules.
- ****Agricultural Security**:** Sowing area forecasts list a precipitation deficit of ****optimal**** in central India.
